Subject: Question that came into a web site regarding California Class II Injection wells

Hi Jerry,

Do you know the answer to this web generated question that came to us from our Headquarters Office?

Name: Andre Martin

Email Address: Andre@cipa.com

Comments: I recently received some information on injection wells within California and was wondering what, if any, level of reporting to the public as far as location of these well and purpose or use of well, is required by companies to disclose that use injection wells? Thank you

I found public notification requirements for Well Stimulation that are fairly recent, but nothing for well permit applicants yet. We were also wondering how Community Right-to-Know Act and the Toxics Release Inventory (TRI) are handled for Class II Injection wells.

Thanks,

Joel Coffman Groundwater UIC Office
